SUMMARY

Backend-focused Full Stack Developer specialising in Laravel, Node.js, and React.js. Experienced in RESTful API design, relational and document database schemas, authentication and role-based access control, and WebSocket-based real-time systems. Has built, deployed, and maintained production SaaS applications, delivering a 28% improvement in API response efficiency and a 25% reduction in report generation time.

PROFESSIONAL EXPERIENCE

Digitize LLC

Feb 2026 – Jun 2026

Laravel Developer (Intern → Contract)

Remote, Pakistan

- Developed the FleetMove Laravel backend for fleet management and booking workflows using PHP, MySQL, and Eloquent ORM.
- Built and integrated RESTful APIs consumed by both web and mobile applications.
- Delivered backend features, bug fixes, and enhancements for real-world production applications.
- Progressed from Laravel Developer Intern to Contract Laravel Developer after completing a 3-month internship.

Axoon Solutions

Jun 2025 – Aug 2025

Backend Developer (Intern / Contract)

Remote, Pakistan

- Developed and maintained backend services and RESTful APIs using Laravel (PHP), Node.js, and Express.js, handling routing, request validation, error handling, and data persistence.
- Improved API response efficiency by 28% by restructuring endpoints, eliminating redundant database calls, and optimising queries.
- Integrated client-side applications with backend APIs, defining request/response contracts and resolving integration defects.
- Debugged and resolved issues in deployed services, applying fixes against live data without disrupting dependent modules.

PRODUCTION & CLIENT PROJECT EXPERIENCE

FleetMove — Fleet Management & Booking Platform | Production Application

fleet-move.com

Laravel, MySQL, WebSockets, JWT, REST API

- Designed, built, and deployed a live fleet operations platform supporting real-time vehicle booking, trip management, and live vehicle tracking; maintain the system in production.
- Implemented JWT-based authentication with role-based access control (RBAC), enforcing separate permission scopes for administrators, operators, and drivers.
- Delivered real-time tracking and notifications over WebSockets and integrated a third-party payment gateway.

OnlyMetric — COGS Intelligence SaaS Dashboard | SaaS Application

Live Demo

Laravel, React.js, PostgreSQL, Laravel Cloud

- Built a multi-module hospitality cost-tracking analytics platform using Laravel, React.js, and PostgreSQL.
- Developed supplier, invoice, and staff management modules feeding real-time cost of goods sold (COGS) reporting.
- Cut report generation time by 25% via query restructuring; deployed and maintained the application on Laravel Cloud.

ODDCO Studios — Animation Studio Website | Client Website

oddcostudios.com

HTML5, CSS3, JavaScript, PHP, SEO

- Designed and delivered a responsive marketing website for a 2D animation and character design studio, showcasing portfolio work across animation, comics, and character concepts.
- Implemented on-page SEO and front-end performance optimisations to improve search visibility and page load times; deployed and maintain the site on the client's live domain.

SZABOT — AI Academic Assistant | AI Project

GitHub

Python, RAG Architecture, Google Gemini API, JavaScript

- Engineered a retrieval-augmented (RAG) assistant using the Google Gemini API to answer student queries in real time.
- Created a Python parsing pipeline that extracts Excel and PDF timetables into structured data for retrieval.
- Implemented intent detection to route queries across classes, exams, and events.
- Developed an admin dashboard for schedule uploads and query monitoring.

TECHNICAL SKILLS

Backend: Laravel, PHP, Node.js, Express.js, Eloquent ORM, REST API Design, WebSockets, Authentication, RBAC, JWT

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, Database Design, Query Optimisation

Cloud & Tooling: AWS, Docker, Linux, Git, Laravel Cloud, Vercel, Postman

Practices: System Integration, Performance Optimisation, Debugging, API Integration, Third-Party Integrations

Additional: Python, FastAPI, Flask, GraphQL, n8n Automation

AI-Assisted Development: GitHub Copilot, OpenAI API, Google Gemini API

EDUCATION

SZABIST University — Karachi, Pakistan

Completed 2026

Bachelor of Computer Science
